THRIVE: A Framework for Understanding the Community Determinants of Intimate Partner Violence

Tuesday, August 2, 2016

2:00 - 3:30pm Eastern / 1:00 - 2:30pm Central / 11:00 - 12:30pm Pacific

There is growing understanding that social determinants of health (SDOH) need to be addressed in order to promote health, safety, and health equity. But there are few frameworks and tools that specifically focus on how to address issues like intimate partner violence (IPV) through a SDOH approach.

Prevention practitioners working at the community level are asking questions such as:

- What factors need to be addressed to promote community environments that support safe relationships and decrease rates of IPV? and
- How can efforts to address these factors decrease inequities in rates of IPV rather than exacerbate them?

In this webinar, Prevention Institute (PI) will provide an overview of **THRIVE**, a framework and tool that can help prevention practitioners explore these questions. PI will share work completed in 2016 with support from the Blue Shield of California Foundation to map the community determinants of IPV onto THRIVE. We will also explore how THRIVE can be used as a practical framework and tool to support local IPV prevention efforts in diverse community contexts.
