SOCIAL CHANGE:

When equipped with a heightened level of awareness and an understanding of the concrete actions necessary to get there, social change can occur. This transformation becomes possible when individuals, families, communities, and institutions have access to both knowledge and tools.

This requires:

- Addressing social injustices
- Attention to healing and self care
- Community investment
- Coordination across movements
- Cross-sector involvement

- Culturally-responsive tools
- Intersectional frameworks
- Meaningful collaboration
- Multidisciplinary approaches
- Trauma-informed spaces and practices

We believe that prevention is possible. When we invest together in this outcome, social transformation occurs, and we can end gender-based violence.
